

The New Generation of Fraction Collectors

Foxy® R1 and Foxy® R2 Fraction Collectors

Ideal for Prep HPLC, Protein, and Peptide Purifications.

Teledyne Isco introduces its new high performance fraction collectors in one- and two-rack versions. These fraction collectors feature:

- Sturdy cast aluminum frame
- Easy to use symbolic touch screen interface
- Built-in Ethernet and RS-232 communication capabilities
- Faster tube changes
- μ L delay volume between diverter valve and drop former
- Flow rates up to 100 mL/minute

The two-rack Foxy R2 fraction collector uses radio frequency identification to automatically detect collection racks for easy setup.

These cold room compatible fraction collectors can be adapted to a broad spectrum of applications. The units can distribute fractions into 96 well microplates, standard tube sizes, and bottles. For essentially unlimited volumes, funnel racks can direct fluids to any collection vessel or downstream process.

Multiple fraction collectors may be “daisy chained” together to increase your fraction capacity — an exclusive feature from Teledyne Isco.
